About Meducated

Meducated is a tool developed for the caregivers of the elderly and infirmed to help improve the quality of care. The tool allows caregivers (both professional as well as family and friends) the ability to stay better informed about the medications their patients and loved ones are taking as well as possible drug and/or food interactions. The tool pulls information from multiple data sources that can be accessed via an easy-to-use search feature on the web, a native iOS app and a native Android app.
